THE TREATY QUESTIONS. It is useless to waste much time in spec ulating upon the probable fate of the new treaty with Spain for reciprocal interchange of commodities between Cuba and Porto Rico and the United States, for it i very doubtful if the treaty will be ratified The pressure brought to bear against it already will suffice to crush it, whatever of merit it may possess. The fact that the advantages are not evenly balanced, and that free labor in the United States in the production of interchangeable exports would, to a certain extent, be brought into competition with slave labor and the coolie system, will awaken a sentiment to activity sufficient in itself to work the de feat of the treaty. Generally, reciprocity treaties are approaches to the system of free trade, and where the interchange i unaffected by special tariff rates it is a free-trade system. The right to buy in doctrine. The free traders claim that their system prevents the taxing of the poor as heavily as the rich; reduces the cost of production, and thus enlarges its competition decreases the cost and encourages increased consumption, which enlarges the demand again. All these are the tendencies of free interchanges, and terday. treaties are really based. But this people have just emerged from a campaign in which the fallacies of absolute protection were persistently preached, and in which there was practically no presentation or advocacy of free trade principles, owing to Republican free traders quiet on the one crats, who are free traders if anything, on the other hand. The campaign was too Hawaii occupies a very different field. METROPOLITAN THEATER .- At the Metro politan this evening Morse's "Electricity," a musical comedy and burlesque extravaganza, will be produced by a fine company headed by Miss Fannie Marston, a favorit in Sacramento, and Mr. Frank Forrester The piece is very amusing, and has rather more plot than most of its class. It is said to be costumed elegantly; has fine stage effects, some of which are especially pleas ing, and boasts of a magnificent transformation scene; but its chief attraction lies in the introduction of gems from a score of popular operas, all of which are rendered artistically. The price of admission is only 50 and 25 cents, and the manager is conf dent that with a full house the first nigh the success of the company for a lengthy engagement will be assured. To protect the audience from cold, the manager of the theater has had the heaters placed in position, closed the skylights, and put every thing in condition to insure the comfort of

STRUCK A BONANZA .- Yesterday afternoon, while three small boys were playing marbles in the alley between Third and Fourth, L and M streets, one of them lost a marble under the steps of an old unoccu-pied brick building. He put his hand unlerneath the steps for his marble, when he felt some coin. On pulling it out he found he had about \$30 in dimes. One of his companions became very inquisitive, started to dig in from the opposite side, and he soon began to haul out rolls of silver dollars. Altogether the boys found about \$100, which they divided up between the three of them, and ran off to their homes highly elated with visions of new boots, new toys, and whole barrels of candy. It was afterwards ascertained that the dime were lead, and a very poor counterfeit The dollars, however, are an excellent counterfeit of the 1884 date, have the right ring, but are a little light.

SUPERIOR COURT ITEMS .- Owing to the death of his sister-in-law, Mrs. Mary J Merkindollar, who died early yesterday morning, after a lingering illness, Judge Armstrong continued all of the cases on his calender yesterday. STUCK IN THE DRAW .- The steamer San Joaquin, No. 3, came down the river last evening between 7 and 8 o'clock with a barge load of grain. The barge, in passing through the draw of the bridge, stuck fast, and in consequence the 8 o'clock train from San Francisco could not cross from Washington into the city. Some of the passengers came over in boats, paying two bits for erriage, but the greater number amused themselves as best they could on the Yole side of the river, and at 9:20 were able to come into town on the train, the barge

having been got out of the way. BONDS FILED .- F. H. Russel, Public Ad ministrator, has filed his official bond with the County Recorder, in the sum of \$60,000, with the following sureties: W. R. SAN FRANCISCO RAISED CERTIFICATES. At an evening session of the Board Professor A. J. Moulder, Superintendent of Schools of San Francisco, appeared before the Board and an argument the subject of the much dis-cussed "raised certificates" of San Franawakening to the fact that northern California possesses superior advantages for settlement. If we can fully and truthfully advertise these advantages at once, we shall not fail to reap such results as have been witnessed in the southern counties. The efforts of the office have been directed to induce the large land holders to divide their holdings and sell them out in small tracts to actual settlers. In this direction we have met with marked encouragement. Many of the owners of great bodies of land offer to sell in 20, 40 or 80-acre parcels, on long time, at low rates of interest. If we are supported by the people who are to be benefited, we shall achieve success, and the next three years will see the population, wealth, trade and manufactories of northern California vastly increased. BOOKS. Colonel Ayers. Superintendent of State Printing, appeared before the State Board of Education pending the consideration of blishing the text-books by the State, and made the following suggestions as to plan for distribution of the books when pubhed, together with the estimated cost for rinting, binding, etc., of the same: "The achers, he suggested, should make requitions for books on the County Superinendents; County Superintendents on the State Superintendent; the State Superinendents on the Superintendent of State Printing, who should ship books to destination. The County Superintendent should send with requisition to the Superintendent Public Instruction payment for the books. The State Printing Office being the factory all orders should be filled and shipments made from that office. This would insure conomy in handling and certainty of hipment, and one department would be a check on the other, so that errors would be mpossible. The Superintendent of State Printing should be required to keep entirely separate books for the school-book work, so pat the exact cost of the books could b readily ascertained at the beginning of any iscal year. The price of the books should be

or perhaps only every two years." The cost of outfit, publishing, etc., he stimated as follows: Two power presses, 35x51, or larger... Boiler (48 horse-power), engine (28 horse-power), together with shaftings, pull-

ectrotyping apparatus... Plumbing, extra work, etc.
